PROFILE

AI-empowered Full-Stack JavaScript Developer specializing in scalable backend architectures, high-efficiency API design, and modern React interfaces. Adept at pairing strong core computer science fundamentals with modern AI-augmented workflows to accelerate schema modeling, rapid prototyping, and bug-free production rollouts. Proven track record of end-to-end technical ownership by architecting multi-tenant RBAC systems and high-performance web applications across the MERN ecosystem. Fast learner eager to apply core engineering principles and learn new enterprise backend stacks.

EDUCATION

Bachelor of Technology in Computer Science Engineering Nov 2021 – May 2025 | Aranmula, India
College of Engineering Aranmula
CGPA: 7/10

PROFESSIONAL EXPERIENCE

Full-Stack Developer Nov 2025 – Present | Kochi, India
Brynex Apparels Pvt Ltd

- Drive end-to-end technical feature ownership across core operations platforms, leveraging AI-assisted development tools to rapidly scaffold clean modular controllers, routers, and schemas.
- Architect secure, multi-tier enterprise systems using MERN stack methodologies, role-based access control (RBAC), and stateless JWT session management.
- Generate and validate strict RESTful API contracts with OpenAPI/Swagger documentation, utilizing AI-assisted test suites and validation routines to maintain rock-solid data integrity across web and mobile endpoints.
- Collaborate closely with cross-functional teams to translate complex business workflows into optimized MongoDB aggregation pipelines and highly resilient server runtimes.

Frontend Developer Aug 2025 – Present
Dopamine Couch

- Architect and implement responsive, high-performance UI feature modules in React.js, prioritizing accessibility, smooth transitions, and uniform styling.
- Integrate dynamic REST APIs and streamline client-side state management, utilizing AI-guided code reviews to eliminate edge-case render bottlenecks and state desynchronization.
- Operate in a fast-paced agile development lifecycle, iteratively refactoring frontend components and delivering updates based on continuous user feedback and runtime telemetry.

Mern-Stack Developer Intern Jun 2025 – Dec 2025 | Kochi, India
Luminar Technolab

- Developed responsive frontend pages using React, HTML, and CSS, prioritizing user-centric flows and layout performance parity.
- Participated actively in standard Agile rituals, incorporating daily stand-ups and internal peer review feedback loops to deliver modules on time.

Android Development Intern May 2023 – Jul 2023 | Kochi, India
Neovent Innovations

- Completed a 30-day Android app development internship, gaining hands-on experience with Java, Android Studio, mobile UI design, and debugging.
- Assisted in building a sample Android application under senior guidance by implementing features and resolving issues.

SKILLS

Web Technologies: JavaScript (ES6+), React.js, HTML5, CSS3, Tailwind CSS, Material-UI, Vite, Next.js basics

Databases: MongoDB, MongoDB Atlas, MySQL, Relational Database

Programming Languages: JavaScript, C

Frameworks, Tools & Backend: Node.js, Express.js, REST APIs, Swagger, JWT, Postman, Git/GitHub, Render, Vercel

AI-Augmented Engineering: Claude, Antigravity, AI-driven Rapid Prototyping, Prompt Engineering & Code Analysis

Core Competencies & Soft Skills: Problem Solving, System Design Fundamentals, Agile

PROJECTS

BrynexOne – Lead & Retail Management Ecosystem
React, Node.js, Express, MongoDB Atlas, Flutter API Integration, Swagger
- Engineered a comprehensive full-stack operations management system syncing 25+ retail stores across Kerala; designed the complete multi-tiered RBAC system and backend data model workflows.
- Built an automated background data synchronization engine that pulls walk-in metrics every 15 minutes, seamlessly linking physical billing systems (bookings, returns) with a React admin panel and Flutter app.

Telecaller CRM & Automated Lead Platform
Node.js, Express.js, MongoDB Atlas, JWT, Swagger, Render
- Designed and developed the complete backend architecture of a high-throughput Telecaller CRM platform with secure role-based access control and automated lead synchronization.
- Implemented advanced MongoDB query indexing, intelligent duplicate detection mechanisms, automated follow-up notification triggers, and a round-robin lead distribution algorithm.

Suitor Guy – Premium Groom Rental Platform
React.js, JavaScript, HTML5, CSS3, Tailwind CSS
- Co-developed a high-contrast, media-optimized e-commerce brand interface for a premium groom rental line alongside a team of two developers.
- Implemented elegant, fluid navigation and clean UI components to ensure seamless product browsing layout experiences.

Zorucci – Premium Bridal Rental Platform
React.js, JavaScript, HTML5, CSS3, Tailwind CSS
- Developed the complete responsive web storefront for a luxury bridal wear showcase, emphasizing crisp asset rendering and minimalist layout architecture.
- Optimized client-side load times and micro-interactions across devices to maximize brand presentation and visual continuity.

Dopamine Couch – Mental Health Platform
- Contributed to frontend development for Dopamine Couch, an online mental health and therapy platform, using React, HTML, CSS, and JavaScript.
- Worked on user-facing pages and components with a focus on responsiveness, usability, and clean interface design.

ORGANISATIONS

College Union 2023 – 2025 | College of Engineering, Aranmula
Chairman
Acted as the primary representative for the student body, facilitating communication with college administration and leading student-led initiatives.

National Service Scheme 2023 | College of Engineering, Aranmula
Volunteer Secretary
Organized and led community service events and campus programs, managing volunteer teams and coordinating logistics.
