PROFILE

Full-stack JavaScript Developer specialized in robust backend systems, scalable API architectures, and strategic database management. Experienced in building high-performance production web applications, internal tools, and multi-platform ecosystems using the MERN stack. Proven track record of taking end-to-end feature ownership - from designing complex role-based access control systems and automated background sync engines to implementing high-contrast, minimalist user interfaces.

EDUCATION

Bachelor of Technology in Computer Science Engineering

2021 – 2025 | Aranmula, India

College of Engineering Aranmula

CGPA: 7.0/10

PROFESSIONAL EXPERIENCE

Full-Stack Developer

Nov 2025 – Present | Kochi, India

Brynex Apparels Pvt Ltd

- Take complete end-to-end technical ownership of application features, scaling production-ready web interfaces, API routers, and underlying database models.
- Architect secure enterprise-grade systems utilizing clean MERN stack methodologies, role-based security access matrices, and JWT authorization mechanisms.
- Define robust backend API contracts with exhaustive Swagger documentation and coordinate data migrations across multi-platform desktop and mobile environments.
- Partner closely with cross-functional software teams to transition business logic into highly optimized, clean database aggregation queries and reliable server runtimes.

Frontend Developer

Aug 2025 – Present

Dopamine Couch

- Standardized and managed clean frontend feature sets using React.js to ensure high usability, accessibility, and visual consistency across modern device interfaces.
- Replaced hardcoded application infrastructures with robust REST API connections, centralizing client-side state models without impacting architecture stability.
- Collaborated closely in an agile engineering setting, executing rapid code transformations based on production runtime feedback.

Mearn-Stack Developer Intern

Jun 2025 – Dec 2025 | Kochi, India

Luminar Technolab

- Developed responsive frontend pages using React, HTML, and CSS, prioritizing user-centric flows and layout performance parity.
- Participated actively in standard Agile rituals, incorporating daily stand-ups and internal peer review feedback loops to deliver modules on time.

Android Development Intern

May 2023 – Jul 2023 | Kochi, India

Neovent Innovations

- Completed a 30-day Android app development internship, gaining hands-on experience with Java, Android Studio, mobile UI design, and debugging.
- Assisted in building a sample Android application under senior guidance by implementing features and resolving issues.

SKILLS

Web Technologies: JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, Material-UI

Databases: MongoDB, MongoDB Atlas, MySQL

Programming Languages: JavaScript, C, Python

Frameworks & Tools: React.js, Node.js, Express.js, REST APIs, Swagger, JWT, Postman, Render, Git/GitHub, Vercel

Soft Skills: Problem-Solving, Cross-Functional Coordination, Project Management, Agile Frameworks

PROJECTS

BrynexOne – Lead & Retail Management Ecosystem

React, Node.js, Express, MongoDB Atlas, Flutter API Integration, Swagger

- Engineered a comprehensive full-stack operations management system syncing 25+ retail stores across Kerala; designed the complete multi-tiered RBAC system and backend data model workflows.
- Built an automated background data synchronization engine that pulls walk-in metrics every 15 minutes, seamlessly linking physical billing systems (bookings, returns) with a React admin panel and Flutter app.

Telecaller CRM & Automated Lead Platform

Node.js, Express.js, MongoDB Atlas, JWT, Swagger, Render

- Designed and developed the complete backend architecture of a high-throughput Telecaller CRM platform with secure role-based access control and automated lead synchronization.
- Implemented advanced MongoDB query indexing, intelligent duplicate detection mechanisms, automated follow-up notification triggers, and a round-robin lead distribution algorithm.

Suitor Guy – Premium Groom Rental Platform

React.js, JavaScript, HTML5, CSS3, Tailwind CSS

- Co-developed a high-contrast, media-optimized e-commerce brand interface for a premium groom rental line alongside a team of two developers.
- Implemented elegant, fluid navigation and clean UI components to ensure seamless product browsing layout experiences.

Zorucci – Premium Bridal Rental Platform

React.js, JavaScript, HTML5, CSS3, Tailwind CSS

- Developed the complete responsive web storefront for a luxury bridal wear showcase, emphasizing crisp asset rendering and minimalist layout architecture.
- Optimized client-side load times and micro-interactions across devices to maximize brand presentation and visual continuity.

Table Tracker – Restaurant Management System

React (Vite), Node.js, Express, MongoDB, Tailwind CSS, Axios, Material-UI

- Built a full-stack restaurant management web application supporting role-based access (Admin/Staff/Customer) and CRUD management matrices.
- Automated operational features including dynamic table reservation flows, live order updates, and localized PDF billing layout generations.

ORGANISATIONS

College Union

Chairman

Acted as the primary representative for the student body, facilitating communication with college administration and leading student-led initiatives.

2023 – 2025 | College of Engineering, Aranmula

National Service Scheme

Volunteer Secretary

Organized and led community service events and campus programs, managing volunteer teams and coordinating logistics.

2023 | College of Engineering, Aranmula
